GGCL Nova Hex collection breathes modern life into this ageless plan with a bigger, extended shape & wealthy energetic colours.

The three mosaic designs have an advanced bend and could be a special elective to more conventional mosaics.

Create glistening modernity with the cutting edge sees of the Nova Hex. With an extended hexagonal shape, these mosaic tiles offer excitement to your space. Add a little chandelier to your stylistic layout to create these tiles truly shimmer.

NOTE: Due to variations in all digital displays, the tile colour and texture shown on this catalogue may vary computer to computer and from screen to reality. Pictures are for representational purposes only. We encourage you to visit our showrooms or retail partners to view tiles in person.
